CHALLENGE. EVERY DAY.

CHALLENGE. EVERY DAY.

the heritage

BASED IN SLOVENIA, IN A PRISTINE NATURAL ENVIRONMENT SURROUNDED BY FORESTS, ALPINA IS A BRAND NAME THAT GUARANTEES HIGH-QUALITY CRAFTSMANSHIP, UNCONVENTIONAL SOLUTIONS, AND FUNCTIONAL DESIGN. AMONG ITS MANY PRODUCT RANGES, ALPINA IS GLOBALLY BEST KNOWN AS THE FIRST CHOICE OF OLYMPIC AND WORLD CUP WINNERS IN CROSS-COUNTRY SKIING RACES. HOWEVER, THE TOP KNOWLEDGE AND STANDARDS NEEDED TO MEET CHAMPIONS' EXPECTATIONS ARE INTEGRATED INTO ALL OF THE COMPANY'S SPORTS AND FASHION FOOTWEAR, SPREADING ALPINA'S FLAIR ACROSS THE GLOBE.

CRAFTSMEN IN THE SMALL TOWN OF ŽIRI HAVE BEEN MAKING FOOTWEAR SINCE THE MIDDLE OF THE NINETEENTH CENTURY. A LOT HAS CHANGED SINCE THE GOOD OLD DAYS, BUT THIS DEDICATION TO CRAFTSMANSHIP AND HANDIWORK HAS REMAINED PRACTICALLY THE SAME. EVERY SHOE THAT COMES OUT OF THE ALPINA DEVELOPMENT CYCLE BEARS TRACES OF TIMELESS WISDOM AND EVERLASTING KNOW-HOW.

75 YEARS OF MANUFACTURING EXPERIENCE USING OUR OWN FACTORIES IN SLOVENIA AND BOSNIA MEAN ALPINA HAS UNRIVALLED KNOWLEDGE AND NOWADAYS A HARD TO FIND EXPERTISE WHEN IT COMES TO SELECTING LEATHER FOR BOOTS. ALPINA'S EXPERTISE LIES IN ITS ABILITY TO TAKE THIS NATURAL PRODUCT, UNDERSTAND ITS CHARACTERISTICS AND APPLY THEM TO A HIGHLY TECHNICAL BOOT FOR YOU. IT IS THIS KNOWLEDGE TOGETHER WITH A RELENTLESS FOCUS ON QUALITY AND PERFORMANCE THAT MAKES ALPINA THE BRAND OF CHOICE FOR OLYMPIC ATHLETES, RENOWNED MOUNTAINEERS, HUNTERS AROUND THE WORLD.

TECHNICAL PARTNERS

Alpina engineers developed the Alpitem membrane based on years of experience, research and refinement. The membrane is water-resistant and allows for good boot ventilation and provides additional comfort.

Breatheable premium upper. For the first time in the world of racing, the circulation of air enables your foot to remain dry and keep your power kick at maximum. On the critical parts of the boot for the high performance, where breathable upper meets the carbon sole, a thin layer of special membrane is placed to prevent any possible water invading.

Alpina boots are made with sympatex, a recognized water-resistant membrane that protects the foot from any unwanted moisture. At the same time, it provides good ventilation, which means the boot is well suited to all kinds of weather and conditions.

Thinsulate insulation provides ideal conditions for the feet, keeping them twice as warm as in other linings. It allows the foot to breathe and provides extra warmth and comfort, even on unusually damp or cold days.

The widely recognized and respected Vibram sole delivers unrivaled firmness, ensuring a steady hold on any and all surfaces, no matter how challenging-the best you can have between your foot and whatever stands below.

The volume control plate, positioned under the insole, allows for precise adjustment of boot volume, independently, for the left and right foot-because not all feet are created equal. Removing the plate provides greater shoe volume.

Alpina's unique fully integrated InTemp heating system keeps your feet comfortably warm at all times, but never overheated.

TECHNICAL SPECIFICS

LEATHER

TOP GRAIN LEATHER

Top Grain leather refers to the process of sanding away the natural grain from the top surface of the leather. Once the outermost layer of the hide is removed it makes the leather thinner and more workable for the manufacturer.

Alpina selects Top Grain leather for its strength, stain resistance and ability to hold its form. This is particularly important to ensure comfort and fit for the wearer.

NUBUCK

Nubuck is top grain leather that is created from the outer side of a hide. The fine grain noted for its velvet like texture and extremely lush appearance. The grain has not been processed, but it is brushed and polished give a slight nap of short protein fibers, producing a velvet-like surface.

NAPA

The leather comes from hides that are treated with chromium salts and dyed during the final stage of production. It has a soft and fine thin grain texture. Because of its flexibility, absorption properties and durability it's used in the tongues and collars of premium boots.

BOX

Box Leather is taken from the hides of calves and has a pliable feel whilst being firm in consistency. It has hard wearing characteristics and thus normally used in tactical and other heavy-duty boots.

SPLIT LEATHER

SPLIT LEATHER

Split Leather is produced from the fibrous or lower part of the cow rawhide that was left after the top-grain has been separated away. The process of splitting the hide creates smaller sections or cuts of varying thickness and quality. Key features: durability, ability to hold colour when dyed and it comes in a variety of thickness grades depending on the use of the boots.

BYCAST LEATHER

Normally it is used in areas exposed to high level of abrasion. Material is made with a split leather backing covered with an embossed layer of polyurethane or vinyl. This is laminated to the surface and then embossed with a leather grain giving the material a slightly stiffer feel.

GUIDE TO A GOOD LEATHER CARE

HOW TO PROTECT YOUR LEATHER HIKING SHOES?

To help your boots last longer and perform at their best, you need to clean and condition them regularly.

Take out the laces, and brush off any loose dirt with a soft brush. If the sole of your shoe has caked-in mud, use a brush with hard bristles. Clean them sooner rather than later so the leather doesn't dry out. Regardless of the material, dirt should be removed as soon as you've finished hiking.

For more thorough cleaning, add running water and whatever boot cleaner you have chosen.

Once water is fully soaked into your boots, apply the conditioner or waterproofing treatment. Read and carefully follow the application instructions for your product. Use leather conditioners with a waterproof breathable lining, because they won't affect leather natural breathability. For some more heavy-duty protection for smooth, full-grain leather, you can also use wax but when it is used on nubuck leather it can change the appearance of your shoes.

Dry boots at normal temperature in a place with low humidity. Do not use a heat source. You can also stuff newspaper into the boots to speed drying. Store boots where temperatures are stable and normal.

SOLE FEATURES

FLEX

Different outdoor categories demand a different types of shoes. That is why we need different types of soles and with the combination of upper materials, we also get different flexibility of the shoe. Mainly, shoes should serve its prime purpose, giving us the ultimate outdoor experience. With the right sole choice, we can surely achieve that, either we need stiffness and reliability or softness and comfort.

SOLE TYPE

The sole is usually made up of several layers. Characteristics of the sole is defined by the sole components within the layers. The insole lies under the footbed and is usually quite thin. The midsole lies between the insole and the outsole and may itself consist of several layers of shock-absorbing and stiffening materials. The outsole contacts the ground and has deep-lugged surface of tough rubber to provide friction and avoid slip on any surfaces. We use full rubber soles, PU midsole combined with rubber outsole and EVA sole with thin rubber outsole-mostly for casual and sneaker models.

FIT

The design and shape of the internal part of the shoe provides optimum fitting. Wider comfort fit for classic and casual group; the medium dynamic fit that falls between the two for hiking, approach and similar active groups. All fit configurations take into consideration higher and lower variations in foot form, wider and narrower foot shape.

LACING

SPEED LACE

Fast and reliable lacing technique for optimal fitting. It allows the adjustment of the internal volumes of the shoe and compresses evenly around the foot simply and quickly, making the fit more precise and customized, offering maximum experience on any terrain.

ANATOMIC FOOTBED

Insole contributes significantly to the vertical stability of the foot, providing a high level of comfort and improves the thermal insulation of the shoe.

MOUNTAINEERING

the mountains are calling

Perfect coexistence of design and functionality. With only 760 g of weight, we represent to you one of the lightest mountaineering shoes on the market. Long-term development with the use of newly developed and innovative materials (Vegan - Friendly), Vibram sole with Bi - density foam, make the shoes comfortable, safe, and offer you a stable step in all conditions.

SEMI-AUTO CRAMPONS

Semi-Auto crampons are a hybrid between strap-on crampons and automatic crampons. They feature a strap style toe that doesn't require a welt, combined with a lever and cable heel piece that attaches securely to a heel welt. They're suitable for CARABINER 626M1 or 656M2.

CARABINER

Getting lost just means finding your own way, but you need confidence in every step that you take. The Alpina Breeze keeps the wind at your back. This new generation of light hiking shoes has a thread that lets you walk with ease, even on the hardest trek. Its modern design and vivid colors make it one of the freshest pieces of sports footwear out there. So step up and wander off the beaten track, because the only path you will ever regret is the one you never take at all.

OPAL

City Trail shoes are an answer to those long hours spent in the urban jungle. Standing, walking, running errands—life in the metropolis can be harsh on the feet. The outer lining of the boots therefore has a water-resistant, breathable membrane, making walking in the city a lot like walking in the countryside. Natural materials and an exceptionally soft sole work together to provide an optimal cushioning barrier and an ideal start for hours and hours of sightseeing.

HUNTING AND TACTICAL

design to protect

Why, with everything else in the world, are we so concerned about what we are offering to put on your feet? This is because every foot poses challenging questions. To protect a working, moving, or tired foot means that you have to come up with ideas that are simultaneously robust and gentle. It means that you have to know everything about the magic of the human leg and even more about the materials and technologies that can ensure its natural movement and guarantee features such as comfort, durability, and flexibility. Once you set out to find these answers, making shoes suddenly becomes a passion. For us this adventure started more than 70 years ago and we are still as excited about it as we were on the very first day.

ALPINAS'S UNIQUE
FULLY-INTEGRATED INTEMP
HEATING SYSTEM KEEPS
YOUR FEET COMFORTABLY
WARM AT TIMES,
BUT NEVER OVEHEATED.

InTemp 

CHARGING

The boot's charging input is small, discrete, easily accessed and weather-proofed. Smart and simple – no need to disassemble the boot to charge.

BATTERY

Batteries are fully integrated inside the boot, and also easily changeable.

SMART CONTROL

Ready to use with the simple push of a button, the system runs at full-power for initial warm-up, then automatically returns to normal power, so feet are optimally warmed but never overheated.

EVERYDAY HERO

Certain situations bring with them a host of challenges, including harsh, hazardous, even hostile conditions and environments. Whether toughing it out in an uncertain conflict zone, out in the untamed wilds of nature or a heavy industrial facility. All of which can prove highly demanding for our sensitive, otherwise unprotected feet. Which is why Alpina develops shoes that step in and intervene – between you and whatever is going on out there. Because regardless of what you're doing, Alpina has a solution that's designed to both care and perform, serve and protect. So your feet stay safe and comfortable, for as long as it takes – as good coming back out as they were going in.

HUNTING AND TACTICAL

fully integrated, fully energized

BUTTON SETTINGS

BATTERY AND CHARGING

Powered by a rechargeable 7.4V lithium battery in the cuff of each boot, you can set the boots to heat at 45 degrees or 55 degrees for up to 4 hours warmth at the touch of button.

Charging time is approx. 2 hours. For charging plug the Y cables of the charger into the plug on the back of each liner and plug the charger into a standard household socket.

SOLE TYPE

SOLE FLEX AND STIFFNESS

SYMPATEX waterproof membrane
Alpina boots are made with Sympatex, a recognized water-resistant membrane that protects the foot from any unwanted moisture. At the same time, it provides good ventilation, which means the boot is well suited to all kinds of weather and conditions.

Alpina's unique fully-integrated InTemp heating system keeps your feet comfortably warm at all times, but never overheated.

The volume control plate, positioned under the insole, allows for precise adjustment of boot volume, independently, for the left and right foot - because not all feet are created equal. Removing the plate provides greater shoe volume.

Firm VIBRAM sole
The widely recognized and respected Vibram sole delivers unrivaled firmness, ensuring a steady hold on any and all surfaces, no matter how challenging - the best you can have between your foot and whatever stands below.

SIZE CHART

HOW DO YOU MEASURE YOUR FOOT SIZE:

You place a piece of paper on the floor next to the wall and step on it with your heel touching the wall. Mark where your biggest toe ends on the paper and repeat the same with the other foot. Step off the paper and measure the distance from the end of the paper to the mark you have recently drawn.
