ABOUT US

STORY

It was 1980 when the Rosato brothers decided to work together in a small workshop in Asolo, assembling ski boots for some of the main brands in the Montebelluna area.

Over the years, the brothers felt the desire and the need to expand their market and following the strong increase in the demand, they made investments to fuel the growth, improving production capabilities and expanding the range of products.

In 1992 La Rocca began producing ice skates and in line with the Roxa brand.

Since then, Roxa products are known worldwide and appreciated for their excellent value for money.

Today Roxa is a leading brand in the production of ski boots, inline skates and ice skates, all this has been possible thanks to hard work, so much passion and great experience in the market.

The willingness and the attitude to the continuous improvement of the products, the active collaboration with leading athletes and the ability to renew and reinvent themselves, make Roxa a leader in quality, reliability and service. Authentic high performance products -

Made in Italy.

RESEARCH AND DEVELOPMENT

Our Research and Development department is made up of people of high quality and technical experience who work every day on our products. These people, in close contact with the sports environments of reference, are constantly engaged in research and improvement of construction technologies, materials and style.

OUR BUSINESS

Our business strategy consists of recruiting and investing in motivated people and supporting them by encouraging their creativity and ingenuity with the aim of always solving every problem in an effective and constructive way.

Our commitment is always aimed at meeting the market in search of communication and exchange of ideas with all our partners, coming to personalize and develop products able to satisfy every type of customer.

PRODUCTION

Our company uses advanced integrated computer systems, 3DCAD modeling, rapid prototyping with 3D printers in PLA / PLS / SLS, rendering and customization on request.

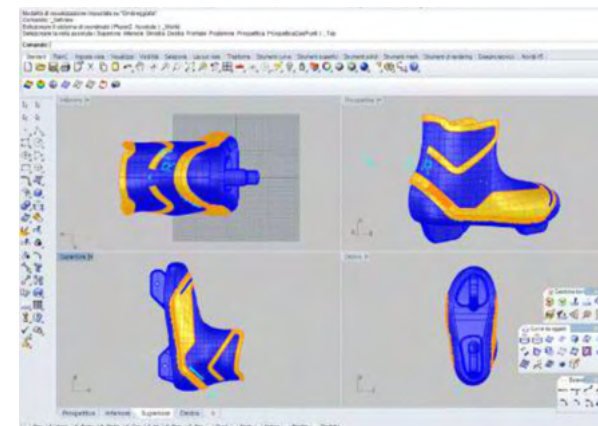

This way of working leads to greater efficiency of the processes and accelerates the production timeline.

Also indispensable is the work offered by the skill, the dexterity and the experience of our molding and assembly workers who take care of every detail to ensure maximum control and quality.

WAREHOUSE

The levels of our warehouse stocks are always sufficient for a quick delivery of the products. Thanks to a flexible and fast logistic and production planning, we are able to handle every type of order efficiently and quickly.

Always striving to meet our customer's needs.
